## Visit to Prakasam Engineering College

"Prakasam Engineering College (PEC) has resumed STEP during their semester-end holidays. A team of two (Charan Varma and Sai Kumar) from EnhanceEdu have visited PEC on 28 Nov, 2011. PEC has been implementing STEP 7 hours a day during this whole week. The EnhanceEdu team stayed at PEC for 2 days and conducted an orientation session on Java for the students, motivated the students to perform better and supported the mentoring process by explaining to the mentors the importance of evaluations and timely feedback (through the use of rubrics).

During the meeting with the mentors and Mr. K. Ramaiah, Correspondent, the EnhanceEdu team understood that the college is conducting special classes for first year students on Engineering Physics, Engineering Mathematics and designing flow charts to make them strong in the fundamentals. The team suggested the use of Raptor in this flow charts course to enable students understand better."

### Student's Corner

Initially all of us were under the impression that what we learnt during through our books was complete knowledge, but after joining the STEP we realised that we have learnt just a part of subject. Learning by doing methodology brings practical knowledge and increases thinking capability. Working with raptor tool is amazing for beginners and clear in every part. Step plays a vital role in making the students technically sound and ready for industry.

### Conference Announcement & Invitation

IEEE's International conference on Technology For Education, T4E2012, will be held in IIIT-Hyderabad between July 18-20, 2012 and will provide a forum to bring together colleagues interested in promoting learning and teaching through the use of technology. This is the fourth in a series of annual conferences. The Conference is expected to have several sessions, jointly or in parallel, on several themes related to research and development efforts in education through the use of technology.

Participants are invited to submit original papers in the following formats to

<http://edas.info/newPaper.php?c=10219>

Full paper (6-8 pages)

Short papers: (3-4 pages)

Reflection papers: (2 pages)

#### Topics:

Sample topics are mentioned below:

- Simulated Communities and Online Mentoring
- Pedagogy Enhancement with e-Learning
- Educating the Educators
- Blended Learning
- Mobile Learning (M-Learning)
- Computer-aided Assessment
- Cognition and learning technologies
- Content repositories for teaching and learning
- Semantic web technologies in education
- Impact of social networks on learning
